Latin roots: answer key

Use after the written tasks. Accept equivalent explanations. Ask learners to explain corrections rather than copy them.

1. Port-: carry.
2. Scrib- and script-: write.
3. Struct- / stru-: build.
4. Spec- / spect-: look or watch.
5. Port- supplies carry. Portable describes a lamp that can be carried or moved. The whole word is an adjective, not the action carry alone.
6. No. Manuscript can refer to a typed document prepared for publication. The history of a word does not limit every modern use.
7. It means build. Struct- / stru- supplies the building clue; the sentence tells us what will be built.
8. Both belong to the looking or watching family. Inspect asks someone to examine closely; spectator names a person watching. A shared root does not make a verb and a noun interchangeable.

Check and transfer

Return to the exit task without the key. Then use the eight-question online check. Read the explanation for each answer.
